Thank you to everyone who visited us at JCK Las Vegas 2025!
We were happy to launch our newest product at the show and appreciate all support we received.
Here's a quick look at the New Products that we introduced.

AMC WA NIPPERS UT

New WA-nippers UT Series is designed and developed especially for jewelry making. It realized both the clean cutting surface and durability. A compact body size allows for easy handling and precise work. You can enjoy sharp cutting and save time for the next processing.

UT-125

UT-150

FILE CLEANING BRUSH FC-1

Powerful Cleaning for Clogged Metal Files!

Easily removes even **stubborn clogs** with brush types that suit different levels of buildup.

[Boar Bristle]

Commonly used for leather care, this natural bristle offers the perfect balance of stiffness and gentleness. It has enough firmness to dislodge debris without scratching the surface.

[Stainless Steel Bristle]

Thinner and firmer than boar bristles, this metal brush is ideal for tackling **heavily clogged** areas with hardened debris.

Designed specifically to clean out **clogged metal files**, this brush effectively sweeps away stuck shavings that toothbrushes can't remove. The combination of stiff **boar bristles** and **stainless steel bristles** ensures powerful cleaning performance for various levels of clogging.

•Specifications

•Item Code: 304-550

•Total Length: Approx. 145 mm

•Bristle Length: Approx. 11 mm

ANTI-STATIC EFFECT BRUSHES GOLD SERIES(SOFT TYPE)

Made in Japan

145G

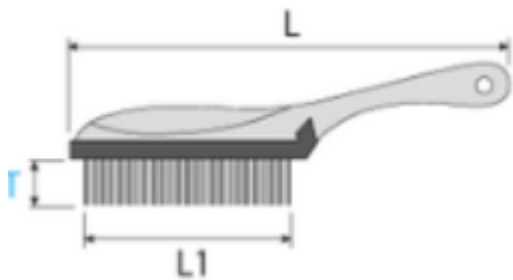

RABBIT G

Advanced Static & Dust Control Brush

Crafted with ultra-fine, highly flexible acrylic fibers infused with copper sulfide, this high-performance brush is designed to prevent issues caused by static electricity and dust.

Conductive Fiber Technology: Acrylic-based fibers are coated with copper sulfide for excellent conductivity.

Gentle Yet Effective: The soft, resilient bristles remove static and dust simultaneously—without scratching delicate surfaces.
