

# SCORPION / SPECIAL ATTACHMENT FOR SCORPION

**SCORPION:** Five times brighter than penlights.

■FEATURES

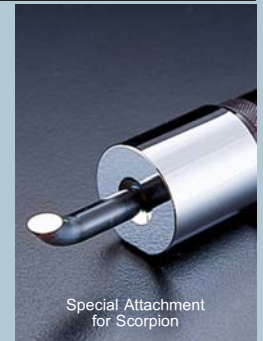

- Though compact, 6500 candelas in brightness is a reality. This is optimal as a light source for star jewels and as permeation lighting for pearls.

★Do not look directly into light while in use.

**SPECIAL ATTACHMENT FOR SCORPION :**  
With this holder attached, SCORPION turns quickly into an identification instrument.

■FEATURES

- Just attach this holder to SCORPION, and you can use it as an instrument for inspecting thickness of pearl coating, flaws in pearls, and substances contained in jewels.
- Damage inspection for emeralds. Nacreous volume inspection.
