SOFT TIP TWEEZERS D-MASTER

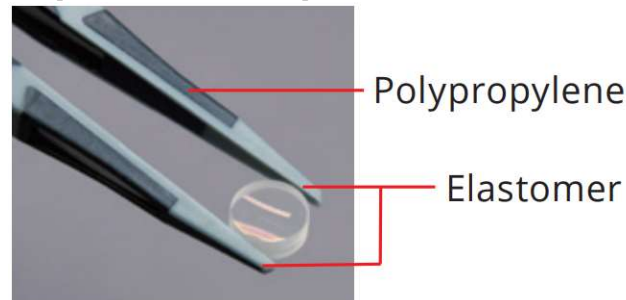

Soft tip tweezers, made of elastomer, can hold gemstones and diamonds tightly without superfluous power and any scratches. Ideal for jewelers and gemologists to handle fragile and precious stones. Suitable for working with melee diamonds, tapered diamonds, diamonds, other gemstones up to 3 carats, small watch parts and more. Also, D-master is electrostatic discharge tweezers, suitable for working with Watch parts, IC, and Glass parts as well. The tip can be replaced once it is consumed or lacked.

Item Code	401-062
Material of Tip	Elastomer
Hardness of Tip	80 ※Shore A hardness
Width of Tip	1.5 mm (Opening width 10 mm)
Weight / Size	17 g / 125 x 10 mm
Option	Replacement Tip (401-063)

Made in Japan

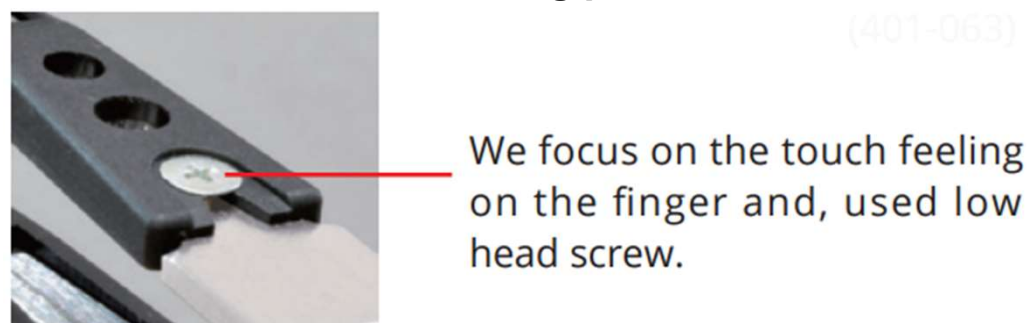

Tips made of special materials: Polypropylene & Elastomer

The combination of elastic, non-slip elastomer, and firm polypropylene provides a soft, yet firm grip on the object. D-master can grab Diamond and Gemstones easily and tightly without any scratches.

Soft tips will not scratch your Diamonds & Gemstones.

Nice Texture & Great holding power

Application:

Suitable for Mele diamond, Tapered diamond, Diamond up to 3 carats, Gemstones. ESD tips are anti-static and also suitable for Watch parts & IC, and Glass parts.

LED LIGHT MR-95 (HIGH COLOR RENDING)

High color rendering (Ra95), which cannot be expressed by conventional LEDs, enables inspection and observation in light close to natural sunlight. The higher the CRI, the better the color rendering ability. Helps you to check the original color of the objects and gemstones. Recommended for research professionals and gemologists.

Item Code	104-064
Model	MR-95
Bulb	LED CRI95 / 25 Lumens
Weight / Dimensions	26 g / ϕ 17 x 100 mm
Battery	AAA battery x 1

High Color Rendering LED Light

High color rendering (Ra95), which cannot be expressed by conventional LEDs, enables inspection and observation in light close to natural sunlight.

the CRI 70 the same red appears dimmed

WHAT IS CRI? (Color Rendering Index)

Color rendering is expressed as a rating from 0 to 100 on CRI. It describes how a light source displays the true color of an object appearing to human eyes and how well subtle variations in color shades are revealed.

The higher the CRI, the better the color rendering ability of the light

CRI 90 or higher is recommended for museums, retail shops, and other settings where color differentiation is essential.

MR-95 (CRI 95) shows colors almost as accurately as daylight (CRI 100).
