Midori Polishing Compound

Midori Polishing Compound is the best polishing compound for Mirror Finish!
Very popular all over the world due to its quality. If you have never tried it, please give it a try.

Midori Polishing Compound

MIRROR FINISH

Specially designed for mirror finish luster of PT, Gold, Silver, and stainless steel or other metals. It gives a beautiful high shine luster with very fine grains.

APPLICATION:

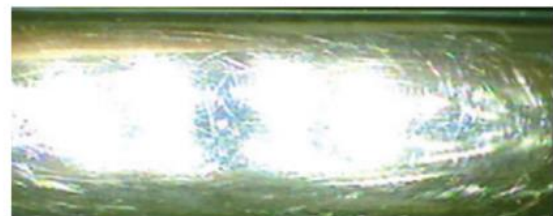

**Gold Silver Platinum
and even stainless**

***Polished with
Midori***

***Polished with
other compound***

EASY TO CLEAN UP AFTER BUFFING

Sometimes, you will get Black spots on rings when buffing.

But, Midori can finish buffing surface of metal clean without heavy stained black spots caused by buff heat. You can just go on ultrasonic cleaning to finish.

Less black spots caused by buff heat

Sonics off faster. Time saving.

TIPS: HOW TO USE

Please use them with the soft buff. Our polishing compounds contain much less oil than other brands. So, **DO NOT** put your buffing with too much compound. Just a small amount of compounds on buff works fine to get a better result. Very dry compound brings high shine luster and best finish with clean surface.
