*Jewelry Care*

## How to care for your jewelry

Is your ring getting dirtier and less shiny than when it was new?

It may seem that rings and other jewelry are made of metal and gemstones and are not easily damaged.

However, since they are actually made very delicately, they get dirty and scratched in all aspects of daily life, gradually diminishing their brilliance.

To maintain the brilliance of jewelry, it is effective to take care of it frequently.

Here are some tips on how to care for your jewelry so that it will remain beautiful and sparkling for a long time.

## Small scratches can be polished

Fine surface scratches make jewelry look cloudy. Re-polishing can reduce the appearance of fine scratches and restore its original luster.

Rub the entire surface of the jewelry with an **abrasive cloth. (AMC Lustering Cloth)**

## AMC Lustering Cloth

is a Jewelry polishing cloth for gold, silver, copper, platinum, stainless, and plastic.

Improved lustering cloth designed for different types of materials. Each cloth is blended with a different compound and wax.

Remove both scratch and oxide layer with ultra-fine abrasive and bring back the original luster.

Gold

Silver

Platinum

When the scratches are no longer noticeable, stop polishing and rinse off the abrasive with a mild detergent and tepid water. After rinsing, wipe off the water with a **soft cloth**. (**AMC Jewelry Cleaning Cloth**) Wipe with **AMC Jewelry Cleaning cloth**, it will enhance the luster further.

**Make it a habit to "Wipe after you wear it"**

Necklaces and rings are often worn on the bare skin. After use, the surfaces of necklaces and rings can become covered with sweat, grease, and, especially for women, cosmetics, making them surprisingly dirty. The easiest way to care for them in daily life is to wipe them after wearing them. Gently wipe the surface with a **soft cloth**. (**AMC Jewelry Cleaning Cloth**).

**AMC JEWELRY CLEANING CLOTH**

High quality microfiber cloth, which has very strong power of wiping out the oil or dirt. Great performance for jewelry, watch, glasses, lens as well as stone. Please wash periodically with soap, then wiping power recover again.

## To care for your pearls, just wipe them off

There is actually only one trick to caring for pearls.

After wearing pearls, please wipe them with a soft, clean cloth. **(AMC CLEANING CLOTHS)**

That is all.

If human sweat or other substances are left on the pearls, they will destroy the nacreous layer due to their weak acidity.

Therefore, please wipe the sweat off after use. After normal use, wipe the entire surface quickly.

When you feel a little sweaty, please wipe carefully by rubbing one by one.

### AMC PEARL CLEANING CLOTHS

## Be careful when storing

Some jewelry may deteriorate due to direct sunlight, air, or moisture, or may become scratched due to improper storage.

Some materials are corrosion resistant and durable, but jewelry is often made from a mixture of several metals, and their properties vary depending on their composition. Basically, store your jewelry in a way that protects it from direct sunlight, air, and moisture.

## Store jewelry one piece at a time

The strength of gemstones varies from durable ones like diamonds to delicate ones like pearls. Therefore, storing strong and delicate gemstones together can cause scratches.

When storing jewelry, make good use of jewelry box dividers to prevent rubbing against each other.

## Storage items

### LOOSE STONE CASE

Model / Size M18 : 57 x 60 x 24 mm
